Heyo Cloud Security, Compliance and Privacy Whitepaper

1. SOC 2 Type II Certification

Heyo Cloud is fully SOC 2 Type II certified by an independent AICPA-accredited auditor.
Our annual audit report covers Security, Confidentiality, and Availability trust service criteria.
Customers on Enterprise plans can request our current SOC 2 report under NDA via security@heyo.so.

2. Data Encryption Standards

Data in Transit: All incoming and outgoing network traffic is encrypted using TLS 1.3 with AES-256 GCM.
Data at Rest: All visitor messages, conversation logs, and uploaded knowledge base documents
are stored in Neon Postgres and Neon Object Storage with AES-256 disk-level encryption.

3. GDPR & CCPA Compliance

Heyo acts as a Data Processor under GDPR. Workspace owners are Data Controllers.
We provide automated Data Subject Request (DSR) workflows for right-to-be-forgotten and data export.
Visitor conversation histories are automatically retained for 90 days by default, customizable in settings.

4. Incident Response & 24/7 Security Operations

Our dedicated security operations center monitors system telemetry around the clock.
In the event of a confirmed security incident, Heyo notifies affected workspace owners within 24 hours.
